IMPORTANT

All GreenBroz trimmers are specifically designed for dry trimming. This guide outlines the ideal moisture level to get the most out of your GreenBroz dry trimmer.

MOISTURE

7-8%

IDEAL MOISTURE LEVEL FOR TRIMMING

BEND TEST

Bend branches and take note of the sound and feeling of the bend.

BUD TEST

Gently squeeze your buds and feel for the density

SNAP SOUND?

Ready to trim!

NO SNAP SOUND?

Too moist, dry out your flower more.

CRUMBLE?

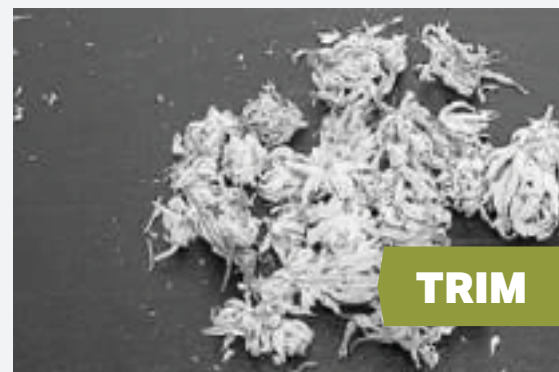

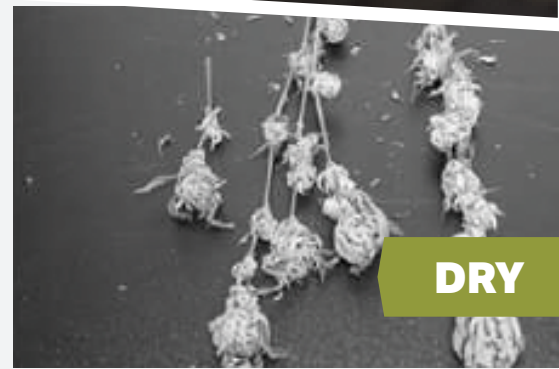

Too dry, try hydrating your flower.

SPRING?

Ideal level, If the bud is springy or firm then its time to trim.

SQUISH?

Too moist, If the bud stays squished and does not bounce back.

TRIM STEM AS CLOSE TO THE BUD AS POSSIBLE
