

G LITE

LEVEL THE PLAYING FIELD

**GREENBROZ**

MACHINE DETAILS

The **G Lite** is a commercial-grade tabletop grinder that enables operations to control their material size, maintain product quality, and speed up downstream processing.

The **G Lite** allows boutique processors to achieve the same appearance, product quality, and consistency of particle size as the largest operators. As a bonus, the G Lite is designed for easy use, maintenance, and cleaning.

- Grinds 15 pounds per hour
- Variable grind sizes
- Weight: 34 Kg (75 lbs)
- Power: 110v / 220v
- Low RPM
- Uniform output
- Whisper quiet motor
- Removable sift and grind trays
- Removable control box
- Adjustable speed control
- Destemmer and grinder in one unit
- Low friction operation is gentler on trichomes
- Dimensions: 58.4 cm x 35.5 cm x 48.2 cm (32"L x 14"W x 19H) (with hopper)
- Construction: washdown ready 316 surgical stainless steel, and HDPE
- Three-year manufacturer's warranty

All GreenBroz machines can be made compatible with international power requirements.

FEATURES AND BENEFITS

1. ENGINEERED FOR GENTLE GRINDING

The G-Lite doesn't pulverize your buds into powder. Instead, it dismantles them. The resulting biomass is perfect for pre-rolls. In addition, delicate trichomes are safe from getting scorched thanks to the system's low friction milling action.

2. PERFECT GRIND EVERY TIME

The machine provides uniform output with perfect, uniform particle size. You can choose from three different grind sizes: 1/8", 5/32", and 3/16". However, any standard stainless steel perforated metal sheet can be fitted to your machine, so your end product can meet your exact specifications.

3. SMALL FOOTPRINT. BIG IMPACT.

Don't let the high throughput fool you. The G Lite weighs just 75 pounds and takes up less space than a storage bin.

4. WAVE GOODBYE TO HARMFUL TOUCH-POINTS

Automating your grinding allows you to upskill employees and move staff into other areas of your Business. Reduced handling time by your team helps preserve the potency of your product

5. NO MORE PUNCTURED PRE-ROLLS

The G Lite's unique milling function leaves stems intact for easy removal. Stemless biomass has multiple benefits for your organization, including increased THC% per pound of material, improved flavor, and of course, no punctures in your pre-rolls.

6. FUTURE-PROOF CONSTRUCTION

The G-Lite is built from surgical-grade stainless steel and other food-grade materials. Everything on the G Lite meets GMP standard regulations to prevent microbial growth and minimize cleaning time.
