

THE HARVEST BUCKET

Built for craft home growers and cultivators who prioritize the quality of their product, **the Harvest Bucket** strikes the perfect blend of size, gentle approach, ease of use, and price.

Just like its automatic GreenBroz trimmer equivalents, the bucket is designed to closely mimic the act of hand trimming your flower without sacrificing its character or potency, while increasing the consistency of your harvest process.

1. GENTLE ON FLOWER

Our patented trichome-safe blades gently remove sugar leaves from buds without damaging trichomes or over-trimming your flower. You'll end up with more of your original biomass in your bags and deliver consistently eye-pleasing buds.

2. INTUITIVE AND CONVENIENT

The bucket is extremely easy to operate with no learning curve required. It also takes a minimal amount of room, so you can dedicate more of your space to other parts of your production.

3. KEEP YOUR EYE ON THE BUD

The Bucket's top-loading design gives you complete control over the finish of your flower. Unlike tumble trimmers, you never lose sight of your buds during the trimming process. This eliminates over-trimming and preserves the plant's quality and character.

4. FOOD SAFE AND EASY TO CLEAN

The Harvest Bucket comes with the same patented blade design as our other trimmers. We use 316 surgical stainless in our solutions to make them easy to clean and prevent microbial growth.
