

PRECISION CAPPER

Automated Capping System

GREENBROZ

MACHINE DETAILS

The **GreenBroz Precision Capper** is the perfect automated capping system for small, medium, or large batches and will increase production 300%+ compared to hand-labor. This machine can cap 2400+ units per hour (no minimum batch size), and works great for tincture bottles, vape cartridges, preroll tubes, and more.

Each unit is consistently tightened or pressed to your desired setting, producing uniform results while reducing the risk of leaking, spills, or other safety hazards that accompany the inconsistency associated with hand-labor.

- Capacity: 2400/hour (*threaded units*)
- Capacity: 1800/hour (*press fit units*)
- Minimum Batch Size: No minimum
- Speed Control: Variable Speed Control
- Application: Works for cape cartridges, tincture bottles, doob tubes, etc. (*Custom fittings available.*)
