FILL CHAMBER

Fill the trimming chamber with flower. Do not compact your flower. Ensure that buds can freely flow.

OVER-FILLED

If your flower isn't rotating easily to the trimming blade, it likely means the trimmer is overfilled. Simply remove some product and continue trimming.

TRIM TIME

Trim times vary per strain, bud density, and trimmer proficiency. Check buds every five minutes for trim quality and adjust trimming settings for optimal results.

CLEANING

After trimming it is recommended to clean the trimming blades following our cleaning guide.

SETUP

Before trimming prepare your area with sterile gloves and storage. Using our guide, prepare your flower for trimming. Ensure your trimmer functions properly prior to trimming.

WORKING WITH YOUR TRIMMER

GreenBroz trimmers are unique in the way they allow trimmers to work with the machine. Leaving you in control of your trim.

HELPING HANDS

Using your hands provide gentle assistance to your flower during trimming to ensure all buds are fully incorporated and trimmed.

FORWARD & BACK

Using the directional control on the trimmer flip the trimming direction to ensure all buds are trimmed.

SPEED

Adjust the speed during trimming to keep a constant gentle flow of buds around the trimmer.

TRIMMING FLOW

For optimal results use this guide and work with your trimmer to create an even flow of buds in the trimming chamber.
